(54) URGENT INFORMATION SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To provide an urgent information system which can notify an urgent situation by using a radio signal, in a place where the radio signal causing malfunction of a medical apparatus in a hospital or the like cannot be transmitted or a place like a mother destination where information unit is not installed.

SOLUTION: A trinket 2 used in the urgent information system 1 for notifying it urgently to others that abnormality is generated in a state of health is equipped with detectors 11, 12, 13 for detecting the state of health of a body by wearing to the body, and a radio signal outputting part 15 for outputting a radio signal relating to detection data detected by the detectors, as a radio signal (radio signal for bluetooth) at a frequency which does not cause the malfunction of a medical apparatus. The outputted radio signal is transmitted to a server 5 in a hospital and an urgent connection room 7 with bluetooth networks (15, 3, 4, 8).
